ALYCE MODULE

Zhaga Standard LED Module

ALYCE MODULE is a future trend design for luminaires by offering features of standardization, modularization, sustainability. It was designed according to Zhaga standard on mechanical, photometric, electrical, thermal, control interface.

The Zhaga Consortium is a global lighting-industry organization that aims to standardize components of LED luminaires, including LED light engines, LED modules, LED arrays, holders, electronic control gear (LED drivers) and connectivity fit systems. Alyce module opens up a wide range in the luminaires design for panel light, pendant light, recessed light, floor light, track light etc.

Alyce offers various optic options to meet different requirements for office, education, retail lighting etc. Thanks to its modular design,

it significantly saves the costs on installation, maintenance and stock ensuring sustainability, which helps our

clients to be more competitive with such innovative design and additional value.
